Skills

Development
System Administration
Collaboration
Leadership

Python, NodeJS, Ruby, HTML/CSS, Flask, Django, C/C++Chef, Apache, SSH, Hashicorp's Atlas, Linux (Debian & CentOS) IRC, Git & GitHub, Documentation (.mkd, .rst, Sphinx) Public Speaking, Event Planning, Curriculum Design and Teaching

Employment

OSU Open Source Lab, Student Software Developer

05/2014 - Present

Contribute to the internally developed time-tracking API "TimeSync".

Developed Chef Cookbooks for three Open Source Lab projects.

Contributed documentation for five internal projects.

Maintained two Python applications: the Protien Geometry Database and the Oregon Virtual School District Central. Developed plugins, pruned old code, and configured deployment.

Worked with others on large and small projects and helped peers with code review and design.

Hashi Scholars Participant, Atlas Infrastructure Tester

03/2015 - 06/2015

Established and documented deployment best practices for the HashiCorp Atlas stack.

elijahcaine.me, Site Administrator

05/2014 - Present

Served content using Apache and deployed applications using Docker.

Host three applications and a Git service to mirror repositories.

Leadership

OSU DevOps Bootcamp, Curriculum Leader

2014 - 2015

Delivered lessons on Linux basics, web-frameworks, configuration management, and testing. Improved upon previously developed lessons and learning outcomes.

Helped teach over 100 students at an annual 'DevOps DayCamp' kickoff-event

Regularly taught 5-15 students per week in class lessons and personal mentoring.

See the curriculum at devopsbootcamp.osuosl.org.

OSU Linux Users Group, President

2014 - Present

Organized weekly meetings, mentored students in FOSS involvement.

Academics

Oregon State University, Junior

2013-Present

Computer Science coursework including $\mathrm{C}/\mathrm{C}++$ programming and web development.

Learned software engineering concepts and code collaboration.
